

How to do remote research studies for accessibility

Rebecca Topps

Twitter: [@beckytopps](https://twitter.com/beckytopps)

How can I include accessibility in my research?

What are effective methods for finding participants?

Which research tools should I use?

How do I ensure my research sessions are inclusive?

What do I need to consider in the analysis and reporting?

**Helps with
WCAG
compliance**

**Designing
for
everyone**

Accessibility Research

**Inclusive
research
recruitment**

**Drives
innovation and
improvements**

“

We can reach higher and aim to make the user experience delightful for everyone. That's where user research comes in. You have to know the people you are designing for. Including people with disabilities.

Whitney Quesenbery

Things to consider:

**Accessibility
knowledge and
training**

**Check
privacy laws**

**Fix any major
accessibility
issues**

How do I include accessibility?

**2 out of every 10
participants**

Participant recruitment

Participant recruitment

**Internal
research
panel**

**Recruitment
vendors**

**Charities and
Organisations**

**Social media
and forums**

Recruitment considerations

Plan for extra time to recruit

Check your vendor is accessible

Adjust your recruitment screener

Pre-research questions

Do you use any assistive technology or adaptive strategies when using our product?

If yes: What assistive technologies or adaptive strategies do you use?

Are there any accommodations, support or changes we can provide during the research session?

Pre-research questions

How would you prefer to ~~receive~~ the research questions or tasks? E.g. email, verbal, chat...

Would you like to have breaks during the session? How often do you prefer a break?

Are you okay with sharing your video and audio? (if possible offer the option to turn off video)

Who to include when

Interviews

You can research all areas of accessibility and include all user needs

Interviews

You can research all areas of accessibility and include all user needs

Paper prototyping / Mockups

Cognitive; language; communication, and auditory.

Description: When using the Create Issue modal you are unable to access any of the toolbar options within the description text field when using keyboard-only (tab and arrow keys).

Steps to reproduce:

1. Click the Create button in the main navigation menu
2. Use the tab key on the create modal until you reach 'Description'
3. Try to access the toolbar options using keyboard only (tab and arrow keys only)

The screenshot shows the 'Create issue' modal with the following elements:

- Summary:** A text input field.
- Components:** A dropdown menu.
- Attachment:** A button to 'Drop files to attach, or browse.'
- Description:** A text area with a toolbar above it. The toolbar includes options for text style (Normal, Bold, Italic), text color, background color, link, image, mention, emoji, table, code, and more options.
- Linked Issues:** A dropdown menu showing 'blocks'.

A blue box highlights the 'Description' field and its toolbar. A blue vertical line is positioned to the right of the 'Description' field, indicating the focus is on this field.

“

The options are unlabelled, so I can't tell what I am choosing. If I was at work, I would have to ask someone else on my team to tell me what is happening and help me to fill in the form.

Research participant - Screen reader user

Thank you for watching!
