Making Content Usable for People with Cognitive and Learning Disabilities

Lisa Seeman-Horwitz (Invited expert)

325-414 minutes

[Jump to Table of Contents Pop Out Sidebar](#)

Abstract

This document is for people who make web content (web pages) and web applications. It gives advice on how to make content usable for people with [cognitive and learning disabilities](#). This includes, but is not limited to: cognitive disabilities, learning disabilities (LD), [neurodiversity](#), intellectual disabilities, and specific learning disabilities.

This document has content about:

- people with cognitive and learning disabilities,
- aims and objectives for usable content,
- design patterns (ways) to make content usable,

[Security-news] File (Field) Paths - Moderately critical - Access bypass - SA-CONTRIB-2022-065

Security-news <security-news-bounces@drupal.org> on Wed 12/14/2022 1:44 PM
To: security-news@drupal.org

View online: <https://www.drupal.org/sa-contrib-2022-065>

Project: File (Field) Paths [1]
Date: 2022-December-14
Security risk: *Moderately critical* 12/25
AC:Basic/A:None/CI:Some/II:None/E:Theoretical/TD:Default [2]
Vulnerability: Access bypass

Description:
The File (Field) Paths module extends the default functionality of Drupal's core File module, by adding the ability to use entity-based tokens in destination paths and file names.

The module's default configuration could temporarily expose private files to anonymous visitors.

Important note: to fix the problem, database updates must be run in addition to updating the module.

This screenshot shows a Microsoft Teams interface. On the left is a navigation pane with icons for calendar, people, attachments, checkmarks, Word, and Excel. The main area displays a list of chat conversations under the 'Focused' tab. The top conversation is from 'Bank of America' with a subject line 'How to add a new payee and us...' and a timestamp of 8:28 AM. Below it is another conversation from 'Bank of America' about setting up automatic credit card payments. At the bottom is a conversation from 'Library Systems'. To the right, a message preview for the 'Bank of America' chat is shown. It features the Bank of America logo, a red banner with the text 'Here's the information you requested on How to add a new payee and use Bill Pay', and a section titled 'Let's get started' with a link to a mobile app and a 'Get Started' button on a smartphone image.

170%

This screenshot shows a detailed view of a Microsoft Teams chat message. At the top left is a back arrow. The title of the chat is 'How to add a new payee and use Bill Pay'. The message is from 'Bank of America' (BA) and is dated 'Wed 11/10/2021 8:28 AM'. The recipient is listed as 'To: Panetta, Alyssa A'. The message content includes the Bank of America logo and a red banner with the text 'Here's the information you requested on How to add a new payee and use Bill Pay'. To the right of the message header are icons for thumbs up, reply, reply all, and forward.

ABOUT THE TOPIC

Cascading Style Sheets

Cascading Style Sheets (CSS) was introduced within the HTML 4.0 specification to separate content from formatting, and to provide precise document layout and format control. The Hypertext Markup Language allows authors to intersperse tags for controlling the display of...VIEW MORE

Cognitive Load

Cognitive Load

LONG-TERM

Memory

← **STORAGE**

VS

FUNCTION

WORKING

Memory

**Cognitive
Load**

How much **working
memory** we are using

Forms of Cognitive Load

Intrinsic

- How complex the given task is
- Ex. Online banking v. Stockbroker trading

Extraneous

- Added friction, distractions, design complexity
- Use of unfamiliar patterns

Germane

- Connects current info/challenge with existing mental models stored in your long-term memory

Intrinsic

- How complex the given task is
- Ex. Online banking v. Stockbroker trading

Extraneous

- Added friction, distractions, design complexity
- Use of unfamiliar patterns

Germane

- Connects current info/challenge with existing mental models stored in your long-term memory

REDUCED

Increased

Cognitive Load

“

For any task to be successful, motivation must equal or surpass cognitive load.

”

**How can we design
to reduce cognitive
load?**

Making Content Usable for People with Cognitive and Learning Disabilities

Help users understand what things are and how to use them.

Help users find what they need.

Help users focus.

Help users avoid mistakes and know how to correct them.

Use clear, understandable content.

Support adaptation and personalization.

Ensure processes do not rely on memory.

Provide help and support.

Make your Site Easier To Use

- Use Semantic HTML and Familiar Layout Patterns
- Use Modern CSS and Make Your Site Flexible
- Say it Twice

Semantic HTML and Familiar Layout Patterns

<header>

<nav>

<main>

<section>

<aside>

<footer>

**Maximize
Germane,
Minimize
Extraneous**

- Familiar Layouts
- Familiar Interactions
- F-pattern Scan

Use Clear Headings

- Easy to scan and meaningful
- Don't use headings to make non-heading text bigger

**Use Modern CSS and
Make Your Site
Flexible**

Modern CSS

=

FLEXIBILITY

Modern CSS Upgrades for Flexibility

Layouts and Alignments → CSS Grid and CSS Math

Text and Whitespace → Relative Units

Honor User Preferences → @preference queries

Move Beyond Viewports → @container queries

 @UAlbanyLibs

Make your Site Easier To Use

- Use Semantic HTML and Familiar Layout Patterns
- Use Modern CSS and Make Your Site Flexible
- Say it Twice

**Where do you even
start . ?**

Possible Upgrades

- Convert a Page Layout to CSS Grid and Math
- Convert Type and Spacing to Flexible Units
- Add preference queries
- Migrate from media queries to container queries
- Clean up your headings
- Add texts to icons/icons to text
- Add transform/transition where only changed color before
- Improve “micro-interactions” like navigation switches

START HERE!

VARIATIONS	VISITORS	CONVERSIONS	CONVERSION RATE	IMPROVEMENT
